A STUDY OF INDIA'S EDUCATIONAL SETTING FOR TEACHERS

RAKESH KUMAR

Research Scholar, Department of Education,
Dr. A.P.J. Abdul Kalam University, Indore M.P., India

ABSTRACT

Teacher education is defined as "a plan of education, research, and training of professionals to teach from pre-primary through higher education levels" by the National Council for Education in the Profession of Teaching (1998). One of the most important aspects of the teaching profession is teacher education. To equip the next generation of teachers for the challenges they will undoubtedly face and the needs of their profession. Teacher preparation programmes around the country have the backing of a national, provincial, and local support institution network that collaborates to enhance education for prospective and existing teachers. If you want to teach, you may get a bachelor's degree in elementary education, elementary teaching certification, or physical education (Pre PTC). Both colleges and university departments provide B.Ed. programmes in education, as do certain universities. The course is also made available via distance learning platforms and open institutions. The number of private institutions offering a Bachelor of Education degree has increased in recent years.
